Figures	13
Preface	15
1 Introduction	17
1.1 Background	17
1.1.1 The diffusion of b2c e-commerce	17
1.1.2 B2c e-commerce and city centre retailing	18
1.1.3 Shortcomings in the literature	19
1.2 Aims and research questions	21
1.2.1 Aims	21
1.2.2 Research questions	22
1.3 Outline of the dissertation	26
Notes	27
References	27
2 B2c e-commerce adoption in inner cities: An evolutionary perspective	31
Abstract	31
2.1 Introduction	31
2.2 Evolutionary economics: supply, demand and geography	33
2.2.1 Supply side: retailers	34
2.2.2 Demand side: consumers	38
2.2.3 Geography: inner cities	40
2.3 Expectations	42
2.4 Conclusions	44
References	45
3 E-shopping in the Netherlands: Does geography matter?	49
Abstract	49
3.1 Introduction	49
3.2 Literature review	51
3.3 Methodology	52
3.3.1 The Dutch retail and transport context	52
3.3.2 Data employed	53
3.3.3 Operationalisation of variables	53
3.4 The spatial distribution of Internet users and online buyers in the Netherlands	56
3.5 E-shopping and the explanatory value of spatial variables	58

3.6	Conclusions	64
	Acknowledgements	65
	Notes	65
	References	65
4	Substitution or complementarity? How the Internet changes city centre shopping	69
	Abstract	69
4.1	Introduction	69
4.2	E-shopping and physical shopping: a literature review	71
4.2.1	Substitution	72
4.2.2	Complementarity	73
4.2.3	Modification	74
4.2.4	Neutrality	74
4.2.5	Summary	75
4.3	Methodology	75
4.3.1	Data collection	75
4.3.2	Sample characteristics	76
4.3.3	Dependent variables	78
4.4	Results	79
4.4.1	Online and offline information search	79
4.4.2	Who dominates the e-commerce market?	84
4.4.3	Perceived effects of e-shopping on city centre shopping	84
4.5	Discussion	87
4.6	Conclusions	89
	Acknowledgements	90
	References	90
5	City centre shopping in the Internet era: The case of the Netherlands	95
	Abstract	95
5.1	Introduction	95
5.2	Research setting: E-shopping and city centre shopping	97
5.3	Data and methodology	100
5.3.1	Data collection	100
5.3.2	Dependent variables	101
5.3.3	Independent variables	101
5.3.3	Sample description	103
5.4	Results	105
5.4.1	City centre attractiveness	105
5.4.2	E-shopping and city centre attractiveness	105
5.4.3	The impact of e-shopping on city centre shopping	109
5.5	Conclusions	112
	Acknowledgements	113
	References	113

6	Internet adoption by retailers in the Netherlands: Does geography matter?	117
	Abstract	117
6.1	Introduction	117
6.2	The Dutch retail context and planning system	118
6.3	Theoretical framework	119
6.3.1	Retail hierarchy	119
6.3.2	Urban hierarchy	121
6.3.3	Regional hierarchy	121
6.3.4	Control variables: product and size	123
6.4	Methodology	124
6.4.1	Data collection	124
6.4.2	Dependent variables	125
6.4.3	Independent variables	125
6.5	Results	129
6.5.1	Retail hierarchy (hypotheses 1a through 2b)	131
6.5.2	Urban hierarchy (hypothesis 3a and 3b)	131
6.5.3	Regional hierarchy (hypotheses 4a through 5b)	131
6.5.4	Control variables: product and size	132
6.6	Conclusions	134
	Acknowledgements	135
	Notes	135

8.2	Variety and change: no dominant design	156
8.3	A new classification of Internet strategies	157

8.4	Internet adoption by city center shops: location, sector, and organization	159
8.4.1	Location	160
8.4.2	Sector	161
8.4.3	Organization	161
8.5	Methodology and variables	162
8.5.1	Data collection	162
8.5.2	The dependent variable: The measurement of Internet strategies	162
8.5.3	The independent variables	166
8.6	Empirical findings	168
8.6.1	Descriptive results	168
8.6.2	Logistic regression analyses of Internet strategies	169
8.7	Conclusions	173
	Bibliography	174
9	E-commerce strategies and performance of Dutch retailers	177
	Abstract	177
9.1	Introduction	177
9.2	Internet strategy adoption and retail performance	178
9.2.1	A typology of Internet strategies	178
9.2.2	Internet use and performance of retailers: a literature review	179
9.3	Data and methodology	185
9.3.1	Data collection	185
9.3.2	Dependent variables	186
9.3.3	Independent variables	186
9.3.4	Sample description	187
9.4	Results	189
9.4.1	Descriptive results	190
9.5	Multivariate results	195
9.6	Conclusions	198
