## **Values and valorisation, Third International Conference on Responsible Innovation**

The provisional programme of the Third International Conference on Responsible Innovation is [now available](#).

### **Unique event**

The international conference will be hosted by NWO and held in The Hague on Wednesday May 21 and Thursday May 22. It is a unique event, bringing together various academic disciplines that share a dedication to responsible, future-proof application of technology and promising social innovations. The organisers say they are proud of the academic level of the papers, which is very high. The most popular research topics are in the fields of health care, energy and innovation in developing countries.

### **Key notes**

Invited key note lecturer is M. Lynne Markus, Professor of Information and Process Management at Bentley University in Massachusetts. Prof. Markus is an internationally renowned authority on the effective design, implementation and use of information systems. From the Netherlands Jeroen van den Hoven, Professor of Moral Philosophy at Delft University of Technology and Tsjalling Swierstra, Professor of Philosophy at Maastricht University will present key note lectures.

### **Science-policy sessions**

Besides academic presentations, Dutch science journalist Pieter van der Wielen will moderate five short discussions on the interaction between innovation research and innovation

policy. In these discussions researchers from Responsible Innovation research programmes will exchange views with policy makers and technology managers from industry.

## Register now

The Third International Conference on Responsible Innovation welcomes academics, policy makers and innovation managers. There is no fee, but [registration](#) is obligatory. The deadline for registration is 14 May.

[Visit the conference website](#)

## MVI match on LinkedIn

If you could not participate in the matchmaking sessions for the [new call](#), but are interested in finding partners to build a consortium, you might like to join the [LinkedIn Community MVI match](#). In this community entrepreneurs may find out what participating researchers have on offer or suggest new research topics. Academics may also launch their ideas and find partners.

## Deadline preliminary proposals

Thursday 15 May, 1 p.m. is the deadline for the (obligatory) preliminary proposals for the [new call](#) in the Responsible Innovation research programme. Until that date and hour applications for research projects can be submitted by consortia composed of researchers from the humanities, the field of science and technology, and social sciences, and at least one private partner. Applications must fall within the research agenda that is made in collaboration with the following Economic Priority Areas:

- › Agriculture & Food / Horticulture & Starting Materials
- › Chemistry
- › Energy
- › High Tech Systems & Materials
- › Life Sciences & Health
- › Water

### ***Responsible Innovation***

*Technological developments may fail if their ethical and social consequences are not considered in time. NWO's*

### **Contact**

- › Dr J. Roodenburg
- › tel.: +31 (0)70 344 08 06
- › e-mail: [j.roodenburg@nwo.nl](mailto:j.roodenburg@nwo.nl)

*Responsible Innovation programme funds and encourages research that considers the ethical and social aspects of new technology from the design phase onwards. Researchers from different scientific disciplines collaborate in this programme, such as ethicists, behavioural scientists, economists, psychologists and engineers.*
