NWO Responsible Innovation Newsflash

December 2015

We are sending you this newsflash because you are involved in NWO's Responsible Innovation research programme. If you do not wish to receive any more of these updates, please unsubscribe. You will find the button by scrolling down.

Announcement

New call for Responsible Innovation (NWO-MVI) in 2016

With a budget of more than six million euros the Responsible Innovation programme (NWO-MVI) has acquired a prominent position in NWO's contribution to the Dutch *Knowledge and Innovation Contract* for 2016-2017, that was signed on 5 October 2015. From 2016 onwards the Responsible Innovation programme will be involved in all top sectors. A new call for proposals will be published in the spring of 2016. Within this newsflash, we inform you about the overall timetable, as well as the currently known possibilities for research proposals.

Matchmaking possibilities

MVI match

MVI match enables you to connect with fellow researchers, organisations and other stakeholders that are interested in the NWO-MVI research programme. Relevant updates about the call will be posted in the MVI match Group as well.

Valoriz

Valoriz is an online platform that enables scientists, organisations and other stakeholders from all over Europe to easily connect. Valoriz is the place for these groups to show society what it

is they are working on, why it is so important to you and how it impacts the world. Please note that Valoriz is not an NWO initiative, but it might be a useful tool to find the right partner to collaborate with.

Conferences

NWO-MVI conference videos

In August 2015 researchers, policy makers and representatives from industry exchanged best practices with each other at the annual NWO-MVI conference. Watch the talks online.

Responsible Innovation

Technological developments may fail if their ethical and social consequences are not considered in time. NWO's Responsible Innovation programme funds and encourages research that considers the ethical and social aspects of new technology from the design phase onwards. Researchers from different scientific disciplines collaborate in this programme, such as ethicists, behavioural scientists, economists, psychologists and engineers.
